

Fly Trapping Unit

A unique unit designed to fit discreetly and easily into suspended-ceilings, providing environmentally friendly fly control. Ideal for convenience stores, supermarkets and areas where space limitations may have previously made situating a standard unit difficult.

- Patented design to fit into suspended ceilings with tiles 24" x 24" / 600mm x 600mm
- Two powerful 25-watt Quantum BL shatter proof ultraviolet tubes for increased coverage and maximum attraction to target flying insects
- Teflon® G coated shatterproof tubes - extra protection in 'glass-free' zones
- Two strategically positioned full-size sticky boards - effective control and maximum catch of all sizes of flying insects
- Sticky boards and UV tubes are interchangeable with other PestWest® Pro units - minimising stocking requirements while providing exceptional performance and value
- Advanced energy efficient electronic ballast system for flicker-free enhanced tube performance, reduces running costs and increases energy savings
- Electronic ballast eliminates the need for starter replacement - easier to service, less maintenance
- No-tool quick and easy to clean and service
- Glue boards can be retained to provide an accurate record of infestation levels for HACCP audits
- Guaranteed 3 years, excluding tubes and boards.

H: 59 cm W: 59 cm D: 13 cm 5.5kgs

Finish: Zintec steel body with painted aluminium cover tray into suspended-ceilings

Coverage: Ceiling suspended: 50m²

The totally discreet unit may be mounted above aisles, as the unique design avoids the possibility of fly fall-out and will control insect infestations in public spaces as well as in the loft area above, where Wasps and Cluster flies may be a problem. Insects are attracted from 360 degrees and are trapped out of sight from the general public.

Ideal for inclusion into new or existing suspended-ceilings. The durable all-metal unit will provide professional protection against flying insect pests.
